GPS Safety Summary
C.I. Pigment Red 122

Chemical Identity

Name: C.I. Pigment Red 122

CAS number: 980-26-7

Molecular formula: C_{22}H_{16}N_{2}O_{2}

IUPAC name:
2,9-dimethyl-5,12-dihydroquino[2,3-b]acridine-7,14-dione

BASF brand names:
Cinquasia® Pink K 4430 FP

For synonyms see end of document

Product Uses

C.I. Pigment Red 122 is a coloring agent for inks and plastics.

Benefits

Cinquasia® Pink K 4430 FP
Application in printing inks: Opaque yellow-shade quinacridone with high durabilities including outdoors
Application in plastics: Highly versatile and attractive pink pigment with high colour strength and outstanding dispersibility. Excellent general performance for a wide range of polymer. Suitable as shading partner. Low-warping in HDPE injection molding
Health Information

Human Health Safety Assessment

Note: The information contained in the table below may be useful to someone handling the concentrated substance such as a manufacturer or transporter. Consumers are not likely to come in contact with the concentrated substance. The data, while verifiable, are not intended to be comprehensive nor replace the data found in the (M)SDS.

<table>
<thead>
<tr>
<th>Effect Assessment</th>
<th>Result</th>
</tr>
</thead>
<tbody>
<tr>
<td>Acute Toxicity</td>
<td>Virtually nontoxic after a single ingestion, a single skin contact and by inhalation. The statements have been derived in parts from products of a similar structure or composition.</td>
</tr>
<tr>
<td>Irritation</td>
<td>Not irritating to the skin and eyes.</td>
</tr>
<tr>
<td>Sensitization</td>
<td>Skin sensitizing effects were not observed in animal studies.</td>
</tr>
<tr>
<td>Mutagenicity</td>
<td>No mutagenic effect was found in various tests with bacteria, mammalian cell culture and mammals. The statement has been derived in parts from products of a similar structure or composition.</td>
</tr>
<tr>
<td>Carcinogenicity</td>
<td>No experimental data is available regarding carcinogenicity.</td>
</tr>
<tr>
<td>Toxicity after repeated exposure</td>
<td>Repeated oral uptake of the substance did not cause substance-related effects.</td>
</tr>
<tr>
<td>Toxicity for reproduction</td>
<td>Repeated oral uptake of the substance did not cause damage to the reproductive organs.</td>
</tr>
</tbody>
</table>

Environmental Information

Environment Safety Assessment

Note: The information in this chapter is intended to provide brief and general information of this substance’s environmental impact. The results in the table below refer to testing performed with the concentrated substance. The data contained in this section explain the relative effect of the concentrated substance on the environment, as defined by certain tests.

<table>
<thead>
<tr>
<th>Effect Assessment</th>
<th>Result</th>
</tr>
</thead>
</table>
Aquatic Toxicity
With high probability not harmful to aquatic life in the range of water solubility.

Persistence and degradability
Poorly biodegradable.

Bioaccumulation potential
Not bioaccumulative.

<table>

</thead>
</table>

Phys/Chem Safety Assessment

- C.I. Pigment Red 122 is a powder which is insoluble in water. It is not highly flammable, non explosive and has no oxidising properties

Note: The results in the table below refer to testing performed with the concentrated substance. It is not intended to be comprehensive or to replace information found in the (M)SDS.

Exposure Potential

- **Workplace exposure:** Pigments are often handled in a dusty form, so general precautions against dust inhalation need to be observed. Based on the very low toxicity of C.I. Pigment Red 122 exposures are considered to be without risk other than that related to inert inhalable dust. Nevertheless, workers should follow the recommended safety measures in the extended Safety Data Sheet (eSDS).

- **Consumer exposure:** Based on the very low toxicity of C.I. Pigment Red 122 exposure is considered to be without risk. C.I. Pigment Red 122 released during handling is of no concern for the health of consumers since consumers will not come into contact with
harmful levels of C.I. Pigment Red 122. Nevertheless, consumers should always read product information before use and follow the label/use instructions.

- **Environmental exposure:** Though C.I. Pigment Red 122 is not biodegradable, the substance is not considered to pose an unacceptable risk for the environment. It is with high probability not harmful to aquatic organisms in the range of its water solubility and it does not accumulate in organisms. Conclusively, all identified uses are safe for the environment based on the scientific facts summarized above and when carried out in compliance with recommended risk management measures and applicable regulations.

**Recommended Handling Measures**

*The recommended safety measures generally apply in contact with the concentrated substance. It is NOT intended to replace the comprehensive guidance found in the (M)SDS, only supplement it. Please refer to the (M)SDS for specific safety and first aid measures.*

When using concentrated chemicals always make sure that there is adequate ventilation. Always use appropriate chemical resistant gloves to protect your hands and skin and always wear eye protection such as chemical goggles. Do not eat, drink, or smoke where chemicals are handled, processed, or stored. Wash hands and skin following contact. If the substance gets into your eyes, rinse eyes thoroughly for at least 15 minutes with tap water and seek medical attention. For specific advice please consult the corresponding (Material) Safety Data Sheet of the substance.

All effluent releases that may include the substance must be directed to a (municipal) waste water treatment plant that removes the substance from the final releases to the receiving water.

**Regulatory Information / Classification and Labeling**

Under GHS substances are classified according to their physical, health, and environmental hazards. The hazards are communicated via specific labels and the (M)SDS. GHS attempts to standardize hazard communication so that the intended audience (workers, consumers, transport workers, and emergency responders) can better understand the hazards of the chemicals in use.

*Note: The hazard statements and symbols presented here refer to the hazard properties of the concentrated substance and are meant to provide a brief overview of the substance’s labeling. It is not intended to be comprehensive or to replace information found in the (M)SDS.*
Labeling according to UN GHS
UN GHS is the basis for country specific GHS labeling

Based on available data, labeling is currently not required.

2. Information on registered substance (ECHA)

Most commonly used synonyms

» 5,12-Dihydro-2,9-dimethylchino[2,3-b]acridin-7,14-dion
» 5,12-Dihydro-2,9-dimethylchino[2,3-b]acridine-7,14-dione
» 2,9-Dimethylquinacridone

Disclaimer

This Product Safety Summary is intended to provide a general overview of the chemical substance. It contains basic information and is not intended to provide emergency response information, medical information or treatment information. The summary cannot be relied on to provide in-depth safety and health information. In-depth safety and health information must be obtained from the Material Safety Data Sheet ((M)SDS) for the chemical substance.

IMPORTANT: While the data and information contained herein are presented in good faith and believed to be accurate at the date of printing, it is provided for your guidance only and may be revised in the future. No warranties of any kind, either express or implied, of merchantability, fitness for a particular purpose or of any other nature are made regarding the data or information provided. Further, it is expressly understood that the data and information furnished by BASF hereunder are given gratis and BASF assumes no obligation or liability whatsoever resulting from use of or reliance on the data and information given.
